GAZCO

MULTI AWARD WINNER

New Generation

eReflex electric fires

Impress with eReflex

Fireside comfort come rain or shine – the new generation eReflex range effortlessly combines beauty with convenient electric heat, putting the artistry of fire right at your fingertips.

But the eReflex doesn't just deliver mesmerising effects and a fireside glow. Designed with the very latest Chromalight® LED technologies, a choice of stunning fuel beds, plus app control, this innovative electric fire range lets you choose the perfect ambience to suit your mood, with only your imagination to hold you back.

Front cover image: eReflex 195RW with Oak Log-effect, shown as three-sided installation. Also shown: optional Mood Lighting system.

Inspiring flames
& fuel effects

Conjuring dramatic flame effects, sparkling embers and an enchanting ambience, the eReflex's ground-breaking lighting systems effortlessly create the magic of a real fire... and much more.

immersive lighting system

eReflex fires use Gazco's Chromalight lighting system to create a mesmerising display with almost endless possibilities. Vivid flame effects are projected to appear amongst the fuel bed for a deep, three-dimensional display and can be set to natural amber, striking blue or even a combination of the two.

Each flame colour is enhanced with down-lighting, bathing the fuel bed in your choice of warming amber or cool white, for a truly immersive display. Eight fuel bed lighting colours illuminate the fuel effects from below, providing relaxing, mood-enhancing ambience. Fuel bed lighting can also transition through each vivid colour for a gradually changing spectrum, providing the ultimate wow factor.

customisable fuel bed

Your eReflex comes with the life-like Oak Log effect, or the contemporary Crystal Ice effect – both of which can be interchanged at your leisure to suit your ambience.
optional mood lighting system

An optional mood lighting system lets you enhance your space, with up to 6 metres of LED lighting for accompanying shelves or around your TV. This kit offers 13 different lighting colours plus a gradually changing spectrum mode to complement your fire, or even your home's décor.

Key features

- Can be easily configured as a three-sided, two-sided, or single-sided fire
- Chromalight® LED System
- Comes with life-like Oak Log effect, or the alternative Crystal Ice effect
- Pulsing glowing embers for realism
- Three flame colour choices including amber, amber with blue accent, and blue
- Downlighting illuminates fuel effects with lighting to complement flames
- Eight fuel bed lighting colours, plus cycling spectrum mode
- Programmable Thermostatic Eco Remote Control
- App control on iOS and Android devices
- Up to 2kW programmable heating
- Ecodesign Energy Saving Features
- Optional Mood Lighting System
- Flames can be enjoyed with or without the heat

Complementary down-lighting

Selection of 8 fuel bed lighting colours, plus spectrum mode

Choice of three flame effects

Ambience on command

Two complimentary control systems put the eReflex's range of visual and heating capabilities in the palm of your hand. Adjust your desired fireside ambience... and relax.

The entire eReflex range can be controlled with a powerful app, available on an iOS or Android smart device. This app offers the ability to control your fire remotely, but with the ease of access from your phone or tablet.

Finer Tuning

The app displays all settings clearly on your smart phone or tablet, giving you precision control over the fire's Chromalight® LED systems. Lighting settings are easily adjustable thanks to the app's slider controls.

Programmable thermostatic heating and flame visuals

With the app, you have the added functionality of being able to easily program your fire to provide different heating schedules. Create up to four daily heating schedules to suit your lifestyle, with room to save up to three weekly programs.

Lighting and Heat Timer

On the app, the eReflex's heat and lighting functions can be set to turn on according to a timer, independently from each other. Set a time to switch on the heat, or opt for the lighting effects alone for a fireside glow in the warmer months without the heat output.

The eReflex range is also controllable via the Eco Remote Control. See page 30 for more information.

complete *peace of mind*

the gazco pedigree

When you choose Gazco, quality and technology are assured. From contemporary hang on the wall fires to traditional stoves, Gazco are committed to creating the ultimate in flame effect fires. Our research and development laboratories are amongst the most advanced in the industry, ensuring that the very latest innovations are incorporated into our products.

Gazco is part of the Stovax Group who offer a prestigious product range, which includes everything from the traditional to the ultra-contemporary in a wide array of styles and sizes. Whether your choice is solid fuel, gas, or electric you can be sure to find a stove or fireplace from our range to add the perfect warmth and character to your home. Full details of the Stovax Group's range of products can be found at **www.stovax.com.**

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all fires in this brochure bearing the UKCA and CE marks. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations.

experience the eReflex

To truly experience the eReflex's realistic flame and enchanting lighting effects, view our short showcase video online. Alternatively, you can visit your local expert retailer to see the eReflex first-hand!

expert retailer network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you will enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements covering both technical issues and design, to ensure that you select the most appropriate product for your home. They will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

In addition, Gazco fires purchased from within our Expert Retailer Network will have the additional benefit of an extended warranty period, subject to terms and conditions. Full details can be found at: **www.gazco.com.**

warranty information

Your Gazco retailer will provide you with a Two Year Warranty for your new electric fire providing it is registered with Gazco. Please note this warranty excludes certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard One Year Non-Extendable Warranty, or minimum statutory warranty for your country. Full warranty details, terms and conditions are available at **www.gazco.com**.

The above information is to assist in your choice of a suitable eReflex fire. It is not intended to be all information required to install your fire. This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Gazco website at: www.gazco.com

Complete control

Flame Options

The eReflex's flames can be set to three different colour choices, including amber, amber with blue accent, and blue, plus a rolling spectrum mode that gradually transitions through all colours. Five brightness settings allow you to create a bespoke visual.

Glowing Embers

Beneath the logs and ember effects, the eReflex's up-lighting LEDs can be set to eight colours to either match or contrast with the flames. There is also a spectrum mode to cycle through each colour as well as adjustable brightness.

Downlighting

Hidden in the top of the eReflex's firebox are discreet downlighting LEDs which bathe the fuel effects in different colours to complement the various flame choices, adding to the immersion.

Optional Mood Lighting

Effortlessly control the eReflex's optional Mood Lighting system using either the remote control or the innovative app (page 6). Choose from 13 colours or the gradually changing spectrum mode, as well as adjustable brightness.

Thermostatic Heating

Choose your preferred room temperature and the eReflex does the rest for you. Select between 16 and 35°C and the fire's 2kW heater will adjust its power to reach the desired level as efficiently as possible.

Adaptive Start Control

Adaptive Start allows the eReflex to automatically turn on up to 45 minutes in advance of a pre-set time to reach the desired room temperature, ready for when you sit down and relax.

Open Window Detection

Should ambient room temperatures drop by 4°C within a space of five minutes, like when a window is opened, the fire's heater will automatically turn off to save energy. Heating can be easily resumed with the remote control or app.

Ecodesign Compliant

The eReflex's innovative energy saving features make it compliant with stringent Ecodesign energy product standards.

eReflex TV size guide

Sizing your eReflex and your TV

There are plenty of choices for installations with your TV or media wall when you choose a Gazco eReflex. Choosing the size of your eReflex electric fire and your TV will come down to both the space you have available and your personal preference. Actual TV sizes vary across manufacturers, and the way your TV is fitted (for example into a cavity recess) will also impact the way it looks in relation to your fire. This is a rough guide for the best pairings of TVs with Gazco's landscape versions of the eReflex fire, but your expert retailer will often be able to help to achieve the perfect look by taking your whole installation into consideration.

Suggested TV and eReflex combinations

Product	TV Size*
eReflex 85RW	32" – 43"
eReflex 110RW	43" – 55"
eReflex 135RW	50" – 65"
eReflex 150RW	55" – 65"
eReflex 195RW	65" – 75"

*TV sizes refer to the standard diagonal screen dimension that TV manufacturers state when describing the size of their products. If sizing your existing flat screen TV, measure diagonally from the top left of the screen to the bottom right to find the TV's advertised size. We also recommend measuring the width and height of your TV if lining it up with the eReflex below.

WIN
the cost of your product back!*

"Not only do I have a wonderful product, a real show-stopper when entertaining but they refunded the cost – in full!"
